

A+ On-site Computer Services & Networking Solutions

Our mission at A+ On-Site Computer Services is simple. Commercial or Residential, we are here to provide the customer with an affordable and practical Computer Repair or Networking Solution.

Anything from Network Design and installation to complete hardware configuration, we work to provide you with a cost effective computer service and network solution that not only makes sense technically but also financially.

Many computer repair companies only focus on one thing. That is, achieving their numbers without regard for quality of service.

Our A+ Certified computer technicians do not sacrifice quality service for volume. We work hard to provide you with a high level of customer service to improve any size business or home office environment.

A+ Managed Services

We realize that managing technology is an essential but difficult task for all sized businesses.

Our goal is to relieve our clients of that burden by utilizing our years of field proven IT expertise for their benefit.

We will take the headaches out of supporting your IT environment at costs your business can afford. Operating as your virtual IT staff, we can design/re-design and maintain your IT infrastructure to be a highly functional, reliable and stable resource.

Realize the productivity and operational improvements enterprise class businesses enjoy.

Meet with our knowledgeable
and
experienced IT professionals

Allow our expert staff to show you how we can upgrade your computer systems and local area network, to keep you ahead of the competition.

Realize the productivity and growth that an up-to-date computer system and an efficient network environment can provide.

Our computer system and network design team can develop and implement a solution that will be both cost effective and manageable. One that will provide optimum usability

A+ Computer Services

With over 20 years of experience in computer system repair, maintenance and network support, we provide an on-site service. We will dispatch a technician to the client premise in response to service calls. We go the extra mile for our clients.

We specialize in the following areas:

- TCP/IP Networking
- Network Design
- Network Firewalls
- Telephony and VOIP
- Switches and Routers
- Software Configuration
- Network Device Configuration
- Disaster Recovery
- Laptop Maintenance and Repair
- Netboot OS installation
- Virus and Malware Removal
- Custom Build Computer Systems
- Desktop Maintenance and Repair

A+ Network Services

Businesses require IT consultants with extensive expertise in building cohesive technology solutions. Even the best hardware and software is of little value if it is installed or configured improperly.

Our senior Microsoft Network Engineers have years of field experience and on-going training to assure success in the design and installations of network solutions, and the management of network services.
